Introduction to the company

- Founded 2014 with current hq in San Diego and presence in Europe
- Several decades of combined team experience in renewable energy and power
- IOWN Renewable Energy Inc. is currently privately held
- Clear focus on renewable energy – wind, solar and storage
- We are an independent provider of transaction services
- We bring our own and other renewable energy projects successfully into operation
- We develop own and co-owned projects (wind, solar and energy storage) in selected markets
What we do
...two main business areas

Project development of wholly or co-owned energy project. We invest time and funds into projects, people and ideas where we believe we can make a difference and where it’s a mutual benefit.

Transaction Services for renewable energy projects, developers and investors.
Renewables, Global installed capacity GW, 1995 – 2012 (to be updated)

Continued very strong growth potential for renewable energy sources

In right balance with wind and storage we believe that solar PV will play an even more significant role in the future than in the past, especially in solar rich zones
We have an active screening strategy for new wind and solar sites throughout selected states in the US – built on a successful GIS platform originally developed 2008 by the team.

Focus on solar and wind development in California and a limited number of other states.

Acquisition of good projects, preferably early stage, from the right developers.
We provide independent transaction services.

We cover the complete value chain in a transaction from optimization of project assets to final contract negotiating.

IOWN consists of a very successful team that lead and closed deals both on sell- and buy-side with leading companies in our industry.

What we cannot do inhouse we source within our network.

We very well understand what is needed to create a successful business.

For you our expertise means avoiding risks and creating best possible return.
Developers
- Local knowledge of land owners and relevant authorities.
- Commitment to the project
- Less experience in securing senior equity and debt financing and construction finance
- In need of a partner for project optimization and structuring in order to move to project to realization

Access to capital
Expertise to manage a successful transaction

Access to projects
Proven track record of successful development
Professional partner for an optimized risk/return profile

Investors
- Looking for long term attractive investments with sustainable and stable yield;
  - Turn key investments
  - Construction ready projects
- Needs a balanced risk return profile of the investment
- High expectations of a project, development, risk control and process management
